Profile

I am a driven software engineer looking to start a career in the tech industry. I would love to work with a team of software engineers to create amazing software and have a good time while we do it. I hope to make a difference with my work and I am eager to find a forward thinking company that is a good fit for me.

Relevant Skills

- Problem solving, adaptable, creative, critical thinker, logical, always want to learn, time management, enjoy feedback, take pride in my work, confident, energetic, honest, hard working, persuasive, attentive, lots of integrity.
- Technical Skills: Javascript, ReactJS, NodeJS, Python 3, HTML5, CSS, JSON, Git, SQL Databases, Flexbox.

Projects

- **Fantastic Fries:** A multi-page, responsive restaurant website that utilizes HTML5, CSS3, Flexbox, CSS Grid, Animations, media queries, custom forms, responsive images, and a range of front end development techniques.

- **Donut Shop:** A group project built in react and posted to Heroku. Our group of four students was given one week to complete this assignment. I chose to work with the back end but helped with the front end after our api was up and running.
<https://dnb-front.herokuapp.com/>
- **Tool Tracker:** A tool tracking application that I built after seeing how many tools were lost or misplaced in the construction industry. This was my capstone project for Bottega built using a React front end and a Sql back end.

Work Experience

- **COP Construction, Laborer** Jun 2019 - Feb 2020

While working this job I learned how to enjoy working hard days and long hours. There were several weeks that we worked over 75 hours in the summer. Some other things that this position taught me was teamwork, punctuality, precision, problem solving, patience, time management, to take pride in my work and never put my name on anything that I wouldn't be proud of when showing the Superintendent.
- **White Water Kitchen and Bath, Detail** Aug 2018 - Jun 2019

My responsibilities were to make sure that all the products looked good enough to send out to clients. I learned several important skills while working this job including precision, patience, taking pride in my work, time management, and it taught me that taking the time to do it the right way is better than doing it twice.
- **Johnson Mark LLC, Debt Collector** Jul 2017 - May 2018

I spent the day talking with debtors on the phone and helping them resolve their outstanding accounts. While I was working here I learned several skills that have helped me in my life including, patience, staying calm in frustrating situations, dealing with difficult or angry people, communication with people who are difficult to talk to, and communicating my thoughts very clearly.

Education

- **Certified Full Stack Web Engineer, Bottega** Feb 2020 - May 2020
Certificate of Competency from an accredited institution. Backed by ACE and AdvancEd.

Hobbies

- Some of my hobbies include skiing, mountain biking, hiking, climbing, fly fishing, backpacking, and anything else outdoors. Obviously I love coding and building cool dynamic programs. I have a passion for listening to good music, playing the piano, and composing my own pieces. I enjoy the company of friends and family and love spending time with them.
